Dear Sarah Acton,

Our names are Roy and Heather Todd. We live right beside this proposed subdivision. We are strongly opposed to having it rezoned to residential. Due to the facts that we have a well that has a flow of 2 gallons a minute and we are concerned this subdivision will use up all the ground water and the well will go dry. There is fish bearing stream on the property all so and this development will damage the fish bearing habitat. The infrastructure out is not conducive to more traffic and we are not served by public transportation and it will become more congested and inconvenient for those that do not have vehicles. Again, we are strongly opposed.

Thank You  
Roy and Heather Todd
