Engineering Services

Dear Sir;

Please find enclosed a petition requesting the removal of a street light on Bourban Road in Mill Bay. There is only one and it was an ill advised installation. The light was installed after submission of a resident petition without any due diligence that I have been able to discover. My petition has more than twice the signatures of the original.

The CVRD supplied me with the criteria used to decide if a situation required a street light and the *installation in question does not meet a single one of the recommendations. The light in fact is very obtrusive to two residences and for the record, neither of these two residences were consulted prior to the installation of the light.*

There are several solutions to resolve the potential need for lights in the area in question and the primary reason for the original request was for dog walking. There is no security risk in this area.

I understand that Bourban Road is a provincial roadway but the fact that it is the main road in a bare land strata and also a dead end road makes me ask the question " why was the strata council not given the courtesy of some input?"

I look forward to your response and the sight of the hydro crew removing the offending light.

Regards  
Ken Molyneaux

# PETITION

This petition of certain citizens of Kerry Village in Mill Bay draws the attention of the CVRD with regards to a street light installed without proper due diligence with a result of a loss of privacy and unnecessary discomfort for the immediate residents.

The installation in question does not meet any of the criteria as published by the CVRD.

The petitioners therefore request the immediate removal of said street light.
